

What does a ★ signify on a BAC Graded item?

BAC grades bullion based on a 1 to 10 scale, derived from the Sheldon Scale, which is comparable to those used for coin and collectible grading, such as the NGCX® scale*.

Any BAC graded and/or authenticated bullion item that has a ★ after the grade, has earned a highly coveted notation, which is truly a rare occurrence.

Items with a **BAC Star** will hold the following attributes:

- 1) Solid original condition and natural preservation;
- 2) Extraordinary eye appeal; and
- 3) Unique characteristics to the item type.

BAC estimates that less than 1 in 1000 items received for submission will receive this special accreditation.
