

## BULLION AUTHENTICATION COMPANY (BAC)

### Announcing the Rise of the New BAC Supernova Designation

*~ Every unforgettable journey is marked by a moment of change*

The BAC grading scale once used a gold star to recognize bullion with exceptional eye appeal. Stars, as powerful as they are, eventually reach the end of their lifecycle, and when they do, something extraordinary happens.

They don't fade.

They explode.

**Into brilliance.**

Today, we proudly unveil the next step in the evolution of our grading designation

**The BAC Supernova** — a mark that signifies a piece of bullion with extraordinary visual impact, solid original condition, and characteristics unique to its type. A supernova doesn't just shine—it shines brightly and it commands attention. It's a **showstopper**.

While the BAC grading scale remains the same, the designation has evolved to better reflect the true value of these exceptional pieces. The standard, distinction, and excellence you trust now carries a designation worthy of its brilliance.

Whether you are submitting bullion for grading or collecting BAC-graded items, look for the all-new **BAC Supernova**. The star may be gone—but from its core, **the BAC Supernova has risen. And it's brighter than ever.**
